📊 List Analyzer: Max, Min, Sum & Average

Enter a list of numbers (comma-separated), and we'll compute the key stats with explanation and graph.

🔢 Enter numbers (comma-separated)

> 5,15,25,35,50,75

💬 Chat Output with Explanation

The list you entered contains **6** elements. Among them, the **maximum** value is **75.0** and the **minimum** value is **5.0**. The **sum** of all numbers is **205.0**, and the **average** (mean) value is calculated as the total sum divided by number of items, which gives **34.17**.
